# Fistula First: grassroot movement Opposed by many experts

Mentors, Friends, Collaborators

thousan...

tizens

# Money& POLITICS IN VASCULAR ACCESS

dominée par Payer: **MEDICARE**  
Federal government health insurance Assurance Maladie finance  
pays **over 80%** of dialysis cost for all dialysis patients

**STANDARD OF CARE IN DIALYSIS**  
(adopté la norme de qualité de soins établie )  
Set by National Kidney Foundation  
(le Comité **KDOQI** *Kidney Disease Outcomes Quality Initiative* )

Why are there problems in USA?  
Tout devrait être parfait, où est le problème alors?

# Pre-Fistula First era-before 2003

# Initial 1997 DOQI Vascular Access Guidelines

Setting établi cible **Goal 40%** prevalent AVF rate

**Ugly** villain message in US dialysis community

If our **experts** could not even get 40% AVF rate,  
ne parvenaissent pas à 40%

It's ok to use **deadly** vascular access-grafts and catheters on  
*La communauté avait la Carte blanche pour dialyser la majorité*  
**60-70%** of HD patients

Is it possible that our **experts** could not get 40% AVF rate?

Dialysis access consortium (DAC) study

University based dialysis centers (Duke U, Boston U, U. Pennsylvania...)

Community based dialysis centers

*J. American Medical Ass.* 2008;299(18):2164-2171

## A Randomized Controlled Trial

*cette étude randomisée contrôlée*

**60% of AVF failed to mature**

Taux d'échec primaire de maturation de 60%

With shining *tel* example from the top

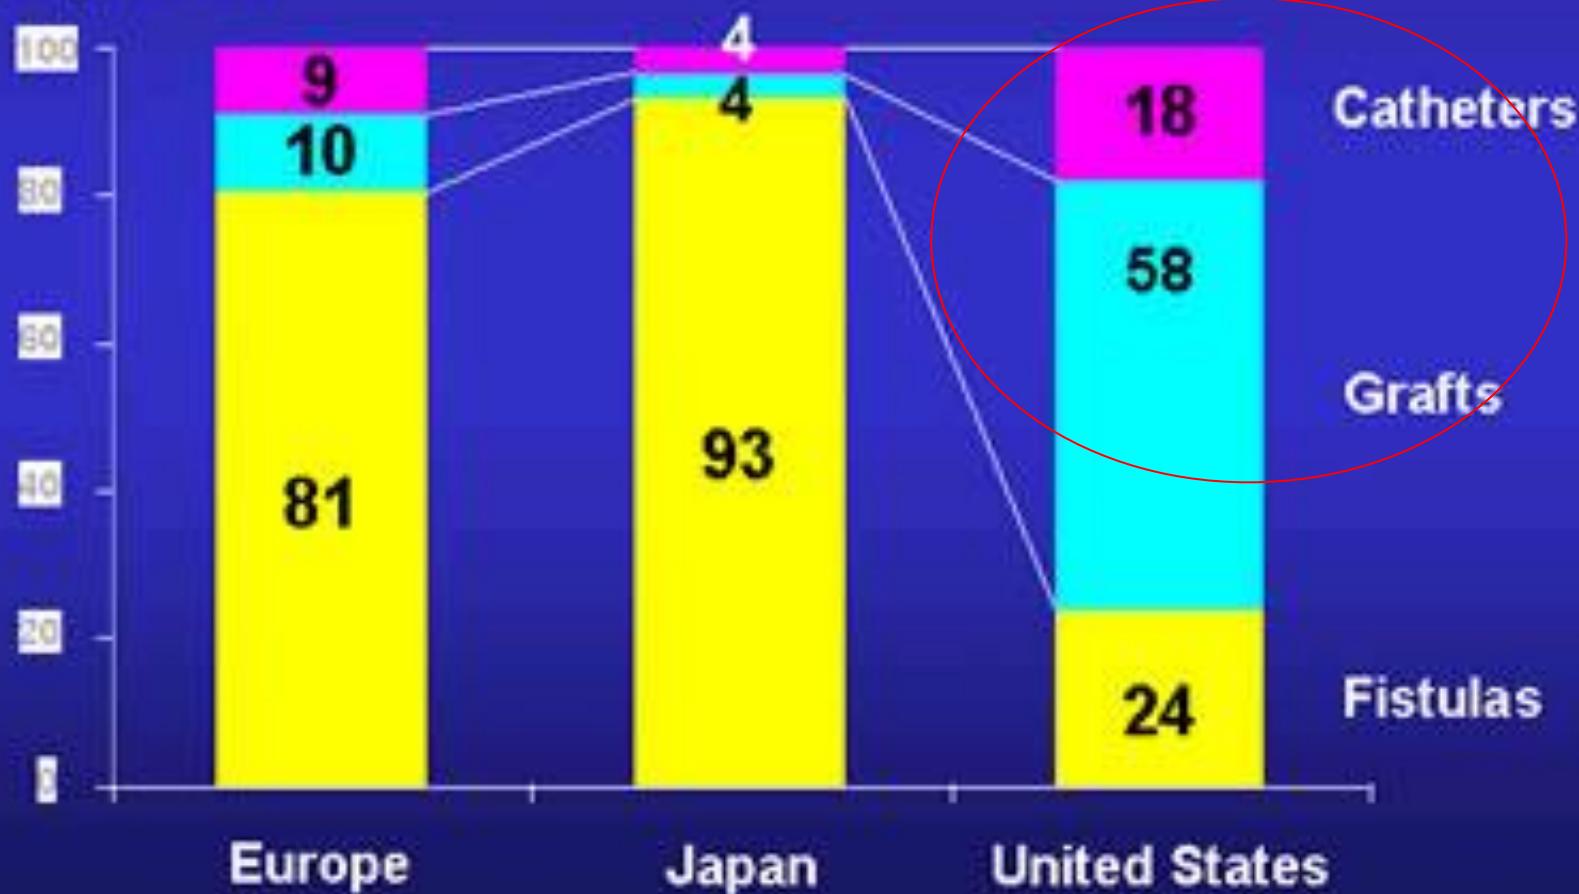

No wonder why America had problems pre Fistula First

*c'est pas étonnant que*

# High AVF Use Among Prevalent Hemodialysis Patients in Europe & Japan

2002 DOPPS

% of patients

High AV Graft use *amène*

High failure rate

Taux d'échec élevé

What did **DOQI experts** recommend

Que conseillent les experts ?

# DEFINITION

2006 DOQI guideline 4-Recommendation

## Detection of Access Dysfunction

AJKD (48) No 1, Suppl 1, 2006. S210-S233)

## Monthly Surveillance of graft:

Periodic evaluation by using tests/instrumentations

- Intra-access flow measurement

- Static venous dialysis pressure

- Duplex ultrasound

## Pre-emptive preventive angioplasty of failing AV Graft

despite the **absence** of irrefutable clinical evidence  
of its **benefits** de preuve clinique irréfutable

# The latest gimmick **stent-graft**

dernier truc

CONTROVERSES ET ACTUALITÉS EN CHIRURGIE VASCULAIRE

*4 regional half day workshops titled  
BACK TO THE **BASICS**: Increasing AVF use*

TARGET AUDIENCE: Nephrologists, Surgeons, radiologists  
and Vascular Access Managers from

Institutions involved in dialysis care of HD patients

Healthcare providers to promote creation of AVF and reduce catheter use

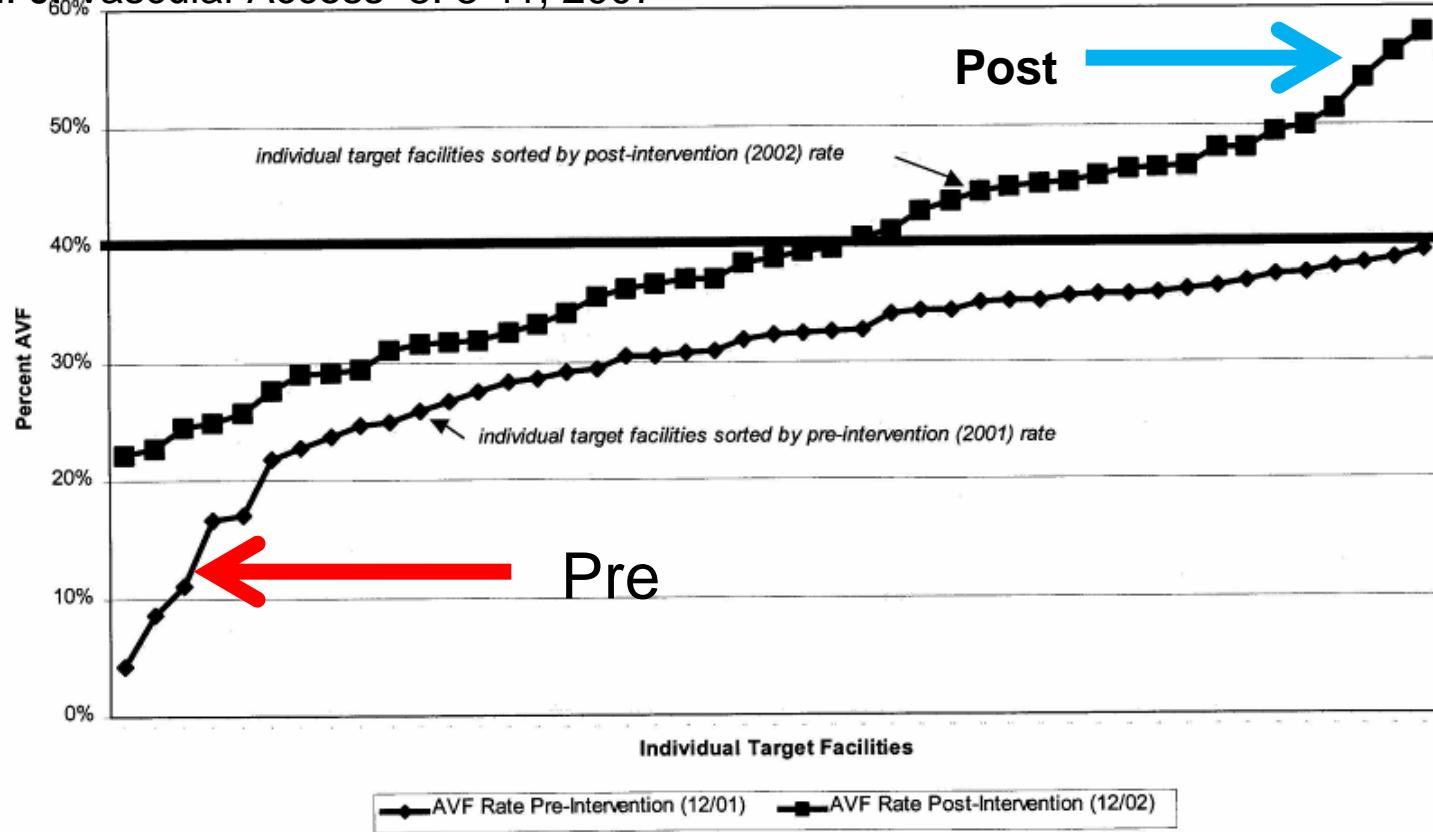

**Multidisciplinary vascular access** approach:  
**early referral**, routine vessel mapping,  
early surgery, AVF cannulation training etc

# RESULTS

**Intervention facilities <40% AVF:**  
43 Facilities, 2869 HD patients

## NWRN AVF Rates Pre- and Post-Intervention (2001- 2002)

Vo Nguyen. J. Vascular Access 8: 3-11, 2007

Northwest Renal Network Contract #500-00-NW16-QIP Final Report-  
Back to the Basics: Increasing the Use of AVF in Hemodialysis Patients

Page 15  
4/25/2003

Pre-Intervention :

**31.4%:** (99.9% confidence limits 28.6 to 34.2%)

Post-Intervention (1 year): (taux cible goal achieved within 1 year)

**40%** (99.9% confidence limits 37.0 to 42.9%)

(8.6% increase p< 0.001, chi square)

*Résultat concluant du Projet Pilote*  
**National Vascular Access Improvement Initiative-**  
launched following year-2003 by **Medicare**

# Change Concepts

1. Routine CQI review of vascular access
2. Early referral to nephrologist
3. Early referral to surgeon for “AVF only”
4. Surgeon selection
5. Full range of appropriate surgical approaches
6. Secondary AVFs in AVG patients
7. AVF placement in catheter patients
8. Cannulation training
9. Monitoring and surveillance
10. Continuing education: staff and patient
11. Outcomes feedback

CONTROVERSIES & UPDATES  
IN VASCULAR SURGERY  
  
JANUARY 23-25 2014  
MARRIOTT RIVE GAUCHE & CONFERENCE CENTER PARIS, FRANCE

Launched 2003: **first goal 40% AVF nationwide**

2004: AVF rose to 40%

FFBI new (**second**) goal: **66% AVF**

2006 DOQI raised AVF goal to **65%**

# POLITICAL IMPACT

## Fistula First

CONTROVERSES ET ACTUALITÉS EN CHIRURGIE VASCULAIRE  
CONTROVERSIES & UPDATES  
IN VASCULAR SURGERY  
**JANUARY 23-25 2014**  
MARRIOTT RIVE GAUCHE & CONFERENCE CENTER PARIS, FRANCE

2010: Northwest Renal Network reached **66.4%**

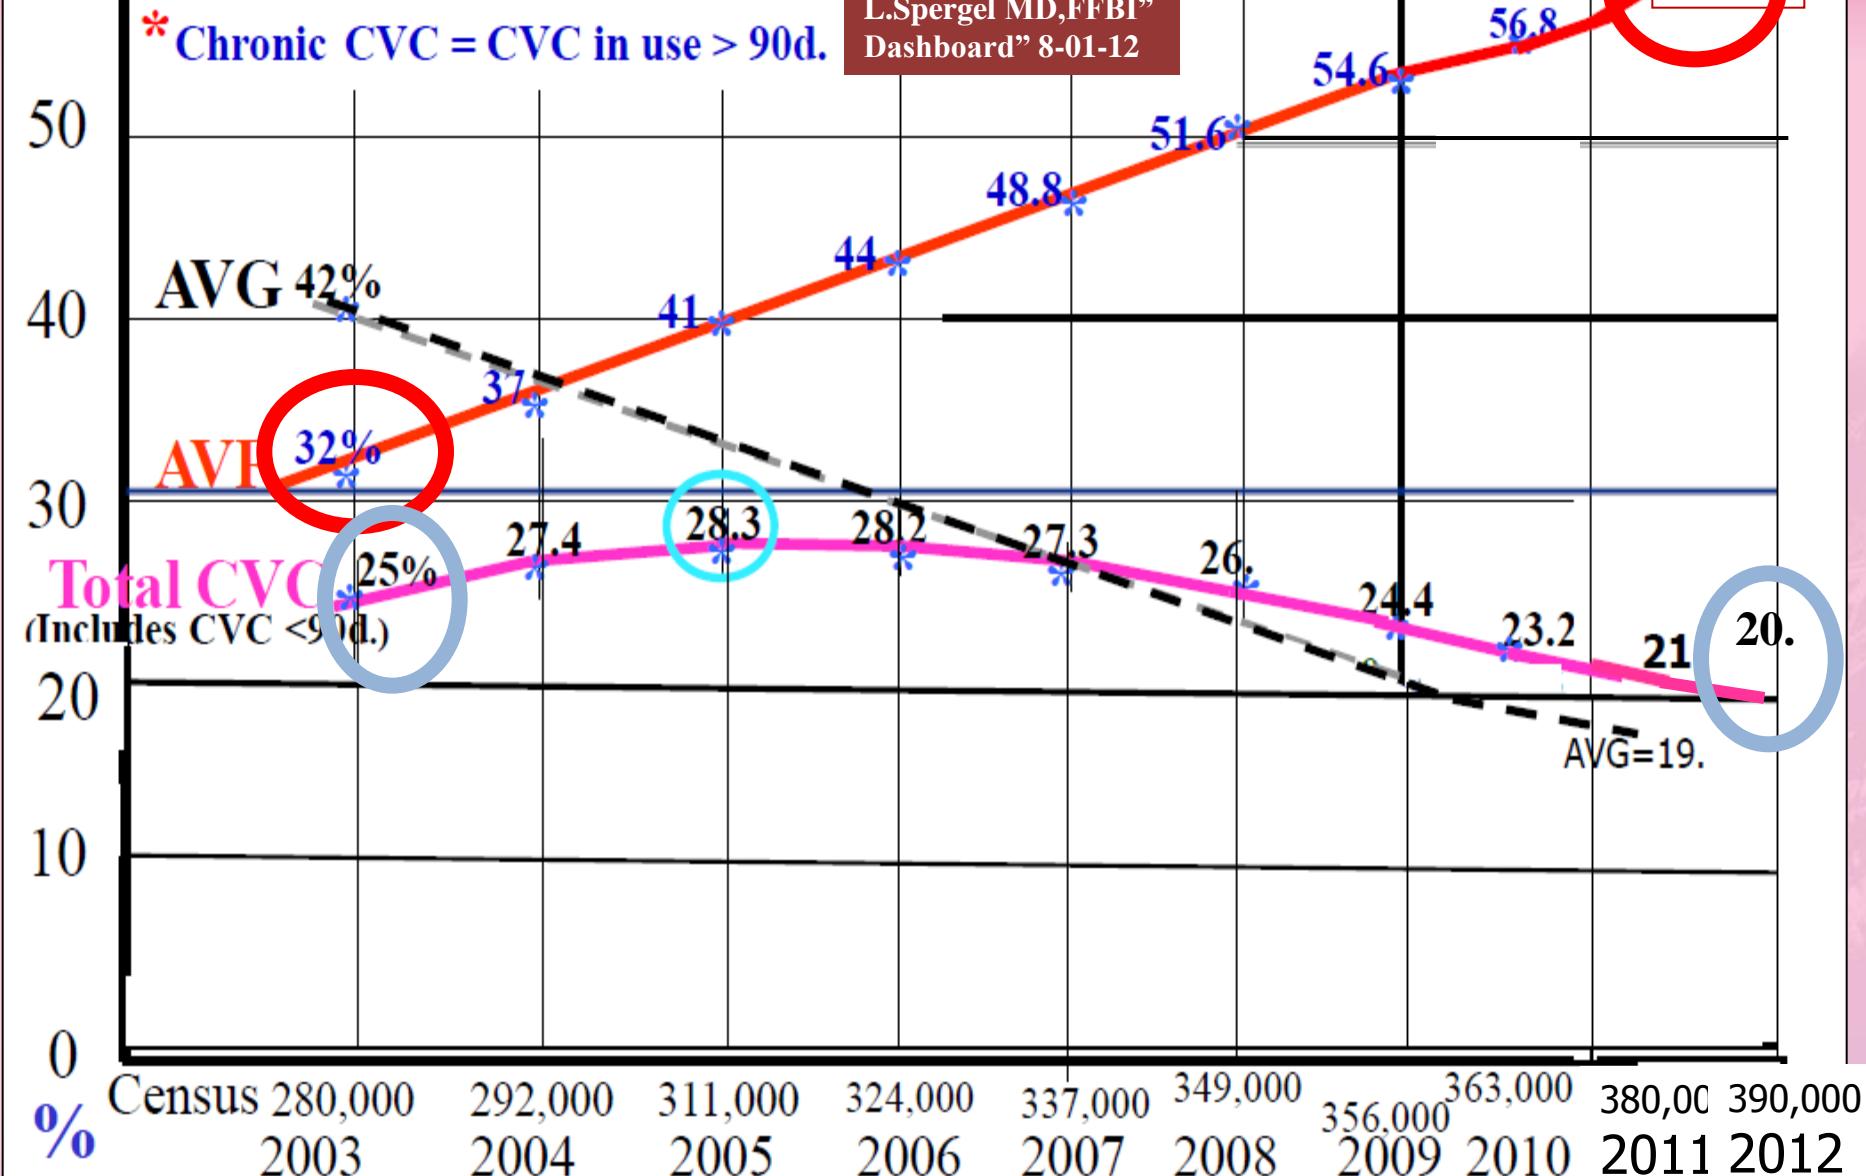

2011 FFBI new (third) goal: **68% AVF**

2011: Northwest Renal Network reached **68.2%**  
National AVF 60.3%

## Trends in AVF, AVG & Chronic CVC\* Prevalence since Fistula

\*Chronic CVC = CVC in use > 90d.

L.Spergel MD,FFBI  
Dashboard" 8-01-12

# POLITICAL IMPACT

## Fistula First

Has brought changes in government funding policies

Better understanding of vascular access issues

**Patients** dialyzed with **AVF** do **better**, at **lower cost**.

Reimbursement for Vascular Access angioplasty is **reduced**  
Reimbursement for AVF surgery is **raised**

Medicare-FF has **raised AVF** goal gradually  
*exigent un cible FAV graduellement plus élevé,  
au cours de la décennie*

Dialysis centers with **low AVF** use is **penalized** financially  
s'ils ne changent pas de comportement

Improvement in AVF is now **unstoppable**  
Grass root action mouvement populaire  
Federal government's policy

# CONCLUSION

**AVF use is rising in the US,  
Catheter use is declining**  
despite an elderly, sick ESRD patients population  
*progrès en abord vasculaire est possible malgré...*

Higher AVF use (up to **80-90%**) is possible  
in the USA

Exceeding DOQI A-V Fistula Target at the Northwest Renal Network 16.  
Is **80-90%** A-V Fistula rate achievable?  
V Nguyen, L. Ball. **Seminars of dialysis** 2014

*Feuille de route pour arriver à 80-90% FAV*

MARRIOTT RIVE GAUCHE & CONFERENCE CENTER PARIS, FRANCE

## LA CRISE

In the era of **declining national health care budget**

Providers must be involved participant dans les débats  
**In National health care politics**

Citizen duty *devoir de citoyen* to fight financial gaspillage  
and to promote better care  
*promouvoir meilleure qualité de soins*

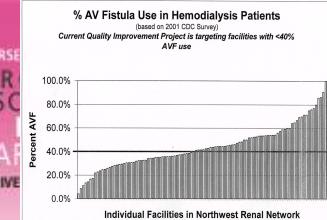

**BETTER CARE= LOWER COST**

Create financial incentives to favor AVF creation  
*La politique financière devrait supporter la création des AVF*

[www.cacvs.org](http://www.cacvs.org)

# National Registry

Une registre nationale est importante:

Data base of vascular access in use-*banque de données*  
**Cost analysis**, complications, mortality of dialysis

Detect, define problems

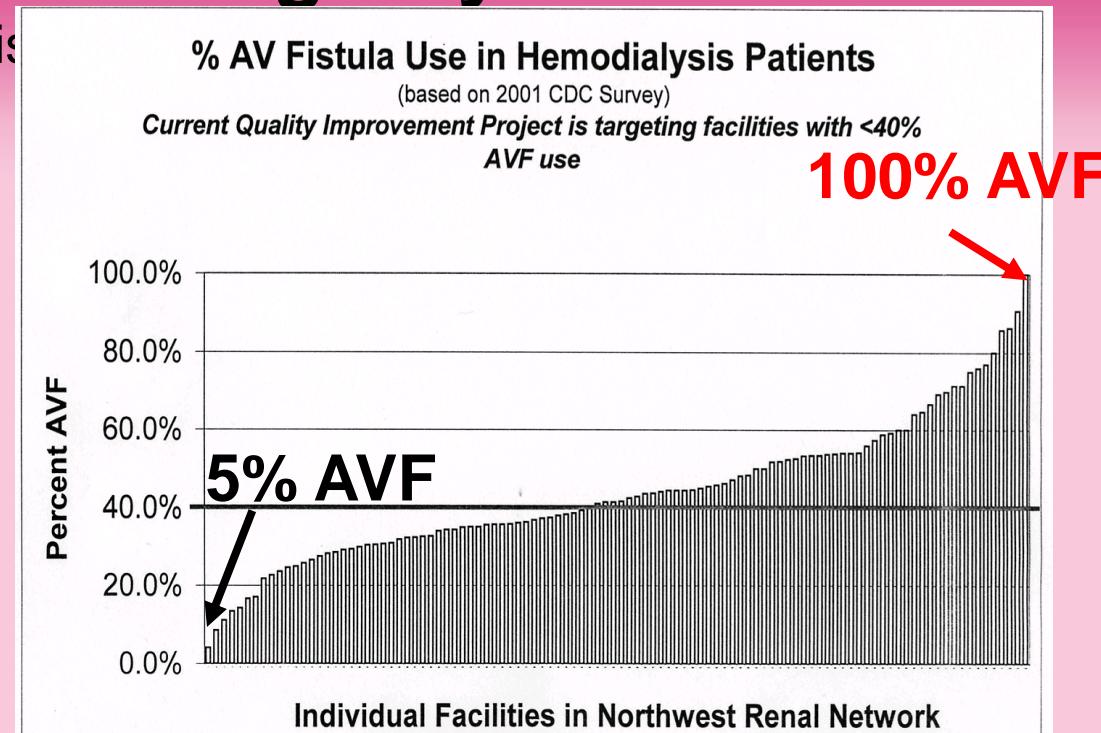

Formulate solutions-future health care policy  
*planification de la politique nationale de santé*

Set goal *établir le but*

Monitor progress- *mesurer le progrès*

# National Registry

Une regis

**CQI** (Continuous quality Improvement) principle:  
compare outcomes between providers

*Amélioration Continue de la Qualité: comparant le résultat entre les différents centres*

Major tool to **change behavior**- for Outliners  
Mauvais résultat d'un centre, comparé avec ses pairs  
souvent stimule un changement du comportement thérapeutique

# Ouf, c'est la fin
